

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

CURRENT STATE SUMMARIES.

Telegraphic Reports for Week Ended July 1, 1922.

These reports are preliminary, and the figures are subject to change when later returns are received by the State health officers.

SUMMARY OF CASES REPORTED MONTHLY BY STATES.

The following summary of monthly State reports is published weekly and covers only those States from which reports are received during the current week:

State.	Cerebrospinal meningitis.	Diphtheria.	Influenza.	Malaria.	Measles.	Pellagra.	Poliomyelitis.	Scarlet fever.	Smallpox.	Typhoid fever.
<i>May, 1922.</i>										
California.....	14	634	166	13	187	3	4	581	176	68
Colorado.....		95	4		17		1	168	71	9
Hawaii.....		12	130		46			1		20
Iowa.....		40			13		2	113	76	4
Kansas.....	3	119	17	1	44		1	151	70	32
Mississippi.....	1	67	753	7,516	42	1,037	2	10	32	147
New Jersey.....	9	475	43	4	5,046		3	972	2	32
Ohio.....	12	480	41	1	5,627		2	588	241	122
Oklahoma.....		5	45	8		3		13	52	18
Oregon.....		54	2		8			42	33	13
Virginia.....	2	90	898	224	868	23	4	71	29	76

RECIPROCAL NOTIFICATION.

Connecticut—May, 1922.

Cases of communicable diseases referred during May, 1922, to other State health departments by department of health of the State of Connecticut.

Disease and locality of notification.	Referred to health authority of—	Why referred.
Measles: Colchester.....	State department of health, Albany, N. Y.	Patient lived at Brooklyn, N. Y., prior to her coming to Colchester, Conn.
Smallpox: New London.....	do.....	Residents of Columbiaville, Stockport, N. Y., had visited home in New London where smallpox appeared the day they left for Columbiaville.
Westport.....	State board of health, Providence, R. I.	Contact with an unrecognized smallpox case returned to his home in Central Village, R. I.

PLAGUE (HUMAN).

Elmhurst, Calif.

One case of human plague was reported in Elmhurst, a suburb of Oakland, Calif., June 29, 1922, in a child 3 years of age. It is believed that the infection was contracted in a locality 25 miles from Oakland.

SMALLPOX OUTBREAK.

Naknek, Bristol Bay, Alaska.

An outbreak of smallpox was reported at Naknek, Bristol Bay, Alaska, June 28, 1922. It was stated that several deaths had occurred.

The column headed "Median for previous years" gives the median number of cases reported during the corresponding weeks of the years 1915 to 1921, inclusive. In instances in which data for the full seven years are incomplete, the median is that for the number of years for which information is available.

City.	Median for pre- vious years.	Week ended June 17, 1922.		City.	Median for pre- vious years.	Week ended June 17, 1922.	
		Cases.	Deaths.			Cases.	Deaths.
